

RUBBER CRUMB

Superior Rubber Crumb Surfacing - For a Soft Bound Finish

SOLUTION

A bound-in rubber crumb surface used for play areas, or to give an alternative decorative finish. Available in various colours for individual designs, calculated to conform to fall height requirement EN:1177:2008.

USES

- ◆ Play Parks and Adventure Centres
- ◆ Seating Areas
- ◆ Landscaping
- ◆ Pathways and Pedestrian Areas
- ◆ Planting Areas
- ◆ Schools and Nurseries and more...

BENEFITS

- ◆ Meets safety standards
- ◆ Brings your surface to life
- ◆ Smooth finish with no loose material
- ◆ Fast installation
- ◆ Extremely durable and hardwearing
- ◆ Maintenance free
- ◆ Extremely flexible

COLOUR CHOICES

A spectrum of vibrant colour options available - graphics can be inlaid as required.

Bright Red

Bright Yellow

Standard Blue

Beige

PRODUCT PREPARATION AND APPLICATION

If your area has play equipment, we can help you calculate the critical fall height - 20mm is a minimum if used just as a decorative cushion. DekorGrip rubber crumb system can be laid over a range of surfaces including tarmac, concrete and compacted MOT Type 1.

Once the correct depth is created, empty pre-measured rubber crumb and resin into a forced action mixer and then into your retained area.

Final finish is achieved by simply levelling using a straight edge and smoothing out using a hand trowel. For best results we recommend using a hand roller for a final finished surface.

SUPPORT AND MAINTENANCE

- ◆ Samples, full method and safety data sheets, demonstrations and on-site application supervision available.
- ◆ Constant helpline to answer questions and calculate critical fall height requirements.
- ◆ Forced action pan mixer hire available.
- ◆ Keep the surface regularly swept clean and hose with clean water when necessary.
